

Going For Gold North West

Gold medal is one of the UK's leading online travel retailers and has a huge visibility to the outside world through its Internet connections and online business partners. We employ over 700 staff and our IT department is crucial to the company's success in this highly competitive industry. Our culture is one of regular change and requires innovation, speed of response and pragmatism as well as demanding excellence in technical support and deployment. The success of our IT systems has been central to Gold Medal's recognition as The Guardian and Observer's Best Online Booking Service, Travel Awards 2004. We require two highly focused and accomplished professionals to join our IT Operations team, both successful candidates will relish the opportunity to make a real difference to the day to day operational success of our web platforms but also the chance to influence the long term strategies relating to our vital web operations.

Security Manager **Negotiable Salary + Excellent Benefits**

Gold Medal's corporate aim is to have the most robust, resilient security systems and policies available to prevent any disruption; our reliance on web technologies carries with it a huge exposure to electronic attack. At the moment, you'll be employed to assess and implement the benefits of the disparate Anti-Virus, Anti-Trojan, Disaster Recovery and DoS product market. At Gold Medal, you will manage and monitor the performance of our security systems and test and verify the effectiveness of our security measures as well as maintaining data protection and compliance. Working closely with the IT Operational management team, your responsibility will be to own and deliver Gold Medal's long-term security strategy.

Web Server (ISS) Analyst **Negotiable Salary + Excellent Benefits**

At Gold Medal, our web systems make a huge contribution to our bottom line. This crucial role requires someone currently working for an organisation that depends on talented, resourceful individuals to ensure optimum availability of business critical web sites. You'll be highly flexible and possessed of the ability to create innovative solutions and have the determination and drive to put them in place. Respected by your peers as someone with a breadth and depth of knowledge in the web systems environment, you'll work in a highly regarded team and be responsible for the design, installation and support of Windows Web Servers (IIS) and utilise COM+ and .Net to implement business logic. This is an exceptional opportunity to make a genuine impact in a dynamic, thriving organisation.
